Manufacturing Windows, Doors, Conservatories and Sealed Units

Stable Door

The stable door is similar to traditional wooden stable door in that it allows the top half of the door to open whilst the bottom half remains securely closed. The stable door gives maximum ventilation to the home while still acting as a barrier ensuring unwanted visitors remain outside, whilst keeping children or pets safely indoors.

The Stable door is manufactured using two main components. The main door operates like a normal door opening at a 90° angle to allow full access to the home. Secondly the half door operates as a Tilt 'n' Turn window, both tilting at an angle for limited ventilation and opening fully at 90°.

There are a variety of colour, panel and glass options to chose from. The door can be fitted with either a solid panel or glass in a variety of styles on both the top and bottom or a solid panel on bottom with glass on top.

Features

- 90° Opening Full Door
- 90° Opening Half Door
- A Range of Colour Options
- Selection of Fill Options (Glass or Solid Panel)
- Fitted with or without a Letterbox
- Comes complete with Standard Security Lock (Standard lock varies depending on profile)
